

Medication Management with GroupRX Pharmacy integration in REACH

Managing student medications in a residential campus is an important responsibility.

Coordinating mixed dosages, dispensing medications at the right time and ensuring the correct medications are provided to the right patients can expose your campus and staff to risk and liability.

REACH and GroupRX ensures safe and efficient medication management for prescription and OTC medications.

REACH can help schools to limit the risk and liability related to medication management through a partnership with GroupRX pharmacy. By integrating GroupRX data into REACH we can provide HIPPA-compliant medication records and prepackaged dose medications under the care of the GroupRX licensed pharmacy. Aligned with more than 40,000 pharmacies across the USA.

The REACH-GroupRX integration delivers a unique medication management opportunity for residential campuses with licensed pharmacist oversight which can:

- reduce your campus risk profile with better access to vital information
- improve record keeping procedures with electronic and printed MARS
- provide personal, prepacked dose kits for patients
- reduce the resources required by campus staff on medication preparation, delivery and management , and
- simplify dispensing and refill management

As a pharmacist organization, GroupRX works closely with campus health centres, parents and doctors' offices to coordinate medication management on campus , helping campus staff to deliver a better experience for the student patient whilst reducing the risk and liability exposure of your school.
