

Introducing Mammoth

REACH Upgrade Version 3.3

Hundreds of hours of development work have gone into the Mammoth upgrade to REACH version 3.3. It is now available for use and will be rolling out to existing users throughout August.

Let's take a look inside and see what you can expect to see in the Mammoth upgrade to REACH v3.3.

A Nifty New User Interface

A cleaner, lighter, faster and smarter user interface that unleashes a range of smart user capabilities.

Improved Metrics Screen

The Metrics landing page is improved with cleaner interface and new components like Birthday lists, RSS feeds and News.

Advanced Leave workflows

Set advanced leave permission workflows with unlimited approval steps and participants or any leave type.

Recurring Leave Events

Create one leave request and one set of approvals for any number of recurring events.

Group Leave Events

Create one leave request for any group or collection of students as a single, common leave request.

Quotas for Leave

Set quotas for any leave type or collection of leave types, for any student group over any timeframe.

Quotas for anything

Why restrict quotas to leave? Set quotas for any event in REACH to create notifications or consequences when triggered.

Groups for parents & staff

You can already create unlimited student groups, now you can also create unlimited groups for parents and staff contacts also.

Calendar Views

New calendar views for staff, parents and students provide easy to use time scale viewing of leave and other events.

Roll Call Grid View

Select from list view or the new grid view when doing a roll call check in.

Improved Roll call functions

Hold your roll call records in place as you change views and push your processed records out of view.

User Defined Fields

Create your own user defined fields that capture information which is not a standard part of the REACH profile.

Happy Birthday!

Student birthday listings and reminder notifications to relevant staff help you to not forget those important moments.

Improved Duty Reports

A popular and useful feature just got better with improved flexibility when writing and sharing Duty Reports.

Calling Maintenance

Create and share a maintenance list on the run and push the information directly to the maintenance department.

Improved Kiosk Interface

Improvements to the Kiosk interface enable more flexibility and greater access to other parts of REACH.

Sign Out Notes

Allow students to leave notes when signing out for additional information and improved knowledge.

More Location Restrictions

More power and flexibility in restricting access to locations and setting time permissions for locations by student groups.

The Headless Kiosk

Hide student images from unattended signout kiosks and run imagery of your choice or news items.

IP Address Geoflags

Know where an approval has originated from in your permissions tracking with geoflags for IP Address location.

IP Address sign-in tracking

Limit campus sign in to devices that are operating from on campus IP address locations.

Improved student Sidebar

An improved student sidebar with better groupings of contact information and student history information.

Unlimited User Roles

Create an unlimited number of user roles in REACH for staff and easily control their access to information in REACH.

Student medical profile

An improved medical profile page in the student record lets you store important medical information for rapid access.

Dash - Leave Summary

A live dashboard means your leave reports are on hand 100% of the time.

Dash - SISO Summary

A live dashboard showing student movement records. Location knowledge is at your fingertips 100% of the time..

Dash - Roll Call Checkins

A live dashboard showing historic roll call events providing an always ready display of all roll call results as they happen.

Dash - Checkin Summary

A live checkin category summary for any common roll call or checkin event such as lights out.

File & Document Manager

Store policy and procedure documents in REACH and manage access to them by user types.

Advanced Audit Log

Improved Audit Log management now links common events and makes it easy for you to trace all records for any event.

Data Importer

Import and update your student or staff records with an improved, user friendly data importer wizard.

RSS Feeds

Publish RSS feeds from REACH or display RSS feeds from other sources to display in REACH.

Edit your list

Select which columns to display and where to display them with data table flexibility to help you see what you want to see.

OAuth Single Sign On

Sign in with Google or Office 365 OAuth for easy user access control.

SAML2.0 Single Sign On

Connect your single sign on users with SAML2.0 for premium security.

Cert3 User Authentication

Our very own advanced 3 Factor user authentication system that means nobody ever loses a password again.

Desktop Notifications

Receive desktop notifications from REACH for important alerts even when you are not using REACH.

Broadcast Messages

Broadcast any important alert of message to users by any group selection criteria or user type.

Your REACH, Your Colour

Customise your REACH theme and pick from up to 36 different colour themes.

There's a lot to digest for the Mammoth upgrade to REACH v3.3. We will provide a suite of resources including documentation, videos and webinars to help you understand the range of new features and how they can help your school to get more out of REACH.

Customer portal changeovers will begin on August 1st and by the end of August all existing schools will be transferred.

The future of boarding is with REACH.

We have even more new great features planned and we are already working away on some of these exciting features.

The future is bright. We can see it and with your help we are building it.

The way schools manage boarding is changing forever and as a REACH customer you are leading this change.
